

## Lymington Hospital, New Forest Trust

The light and welcoming atmosphere in patient, visitor and staff rooms within the new Lymington Hospital in Hampshire has been supported by over 1,000 items of seating and tables from the Knightsbridge Healthcare Furniture Collection.

Throughout all areas of the hospital, an uncluttered, contemporary and airy ambience has been facilitated by the strategic selection and placement of furnishings and furniture. The versatile Hamilton range of seating from Knightsbridge proved particularly appropriate, with its upright stacking chairs and high-back seats in standard, drop-arm, petite and bariatric configurations, plus complementary Gamma Dining tables, clearly demonstrating the importance of design appeal, even in hygiene-conscious environments.

The look continues within the restaurant and café areas, Knightsbridge styling is especially evident. The company's Barra circular Dining tables and matching armchairs have been positioned to create a fresh and bright outlook, whilst their flexible layout maximises the use of space.
