Introduction

Design and Manufacturing
Knightsbridge Furniture have been designing and manufacturing contract furniture for over 70 years producing high quality furniture using a combination of traditional woodworking skills and the latest manufacturing techniques, ensuring you receive the best British made furniture available.

Quality Standards
Working to stringent British and European Standards we have been awarded BS EN ISO 9001:2008 for our Quality Management System. Additionally, our chairs meet BS EN 15373:2007 for Strength, Durability and Safety and BS EN 7176:2007 for Resistance to Ignition.

Preferred Supplier Status
We are proud to hold preferred supplier status with both the NHS and SHS along with many leading private health and charitable care organisations.

NHS contract no. 2013/S 022-033974
SHS contract no. TAG 801
NHS Mental Health Contract Number 2012/S38-061381
Preferred supplier to HSE Ireland

Environmental Standards
In recognition of our commitments to reducing the impact of our actions on the environment we have attained ISO 14001:2004 environmental management system.

Our timber purchasing policy ensures all timber is sourced from sustainably managed forests. Timber waste is recycled whilst waste reduction techniques are used at every stage of the production process.
The strikingly styled Cubitt range provides a modern yet supportive option of seating for ward environments.
• Ergonomically designed backrest gives excellent lumbar support and increased comfort
• Supportive arms aid rising
• Hygiene gap prevents trapping of dirt and bacteria between the seat and back

Webb Associates Cubitt seating range is one of two winning designs in response to a Design Competition Knightsbridge started in 2013. The competition was set up to develop furniture which reflects the growing need for design lead hospital interiors, which improve the healing process for all ages and actively change patient attitudes towards places of care. Cubitt takes full advantage of our expertise in timber engineering and upholstery while delivering a stylish and contemporary aesthetic.
Columba features a beech antimicrobial lacquered frame with ergonomically designed fully upholstered plywood back and hygiene gap.
• Ergonomically shaped back with pelvic and lumbar support

• Three height of back fit into a standard leg frame providing a family of chairs, from a low back visitor chair to two sizes of patient chairs.

• Supportive arms aid rising

• Hygiene gap prevents trapping of dirt and bacteria between the seat and back.

Webb Associates Columba seating range is one of two winning designs in response to a Design Competition Knightsbridge started in 2013. The competition was set up to develop furniture which reflects the growing need for design lead hospital interiors, which improve the healing process for all ages and actively change patient attitudes towards places of care. Columba takes full advantage of our expertise in timber engineering and upholstery while delivering a stylish and contemporary aesthetic.
The Dalton range is ideal for multi-patient environments. Ergonomic design and lumbar support ensure that correct sit and posture is maintained.
Dalton
Key Features

- Handgrips aid rising
- Variable seat depth cushion allows 2 seat depths to ensure correct posture - ideal for multi-patient use

Easy-grip arms aid rising

Hygiene gap prevents trapping of dirt and bacteria between the seat and back

Removable seat cushion allows easy cleaning under seat and helps tackle infection control issues

Waterproof under bottom as standard

Choice of 3 seat heights provides a comfortable solution for users of different heights

Minimised stitching details located in non-contact areas

Profiled seat provides maximum comfort

Easy removal of transfer sheets from behind, preventing the patient from sliding forward

Variable seat depth cushion allows 2 seat depths to ensure correct posture - ideal for multi-patient use

Plugged back screw fixings

Waterfall seat reduces pressure to the back of the legs

Optional Features

- Stackable
- Filled In Sides
- Housekeeping wheels
- Armpads
- Pressure Relief Cushion
- Various Seat Heights Available
- Height Adjusters
- Seat Height Indicator
- Infection Control Seat
- Fixed Seat
• Profiled seat for maximum comfort.
• Vertical heavy duty drop arm model available to ensure easy patient transfer from either side of the chair.
• Bariatric models engineered to cope with weights of up to 255kg and 318kg. Supplied as standard with housekeeping wheels. We recommend the use of arm pads.
• Petite model caters for patients with smaller frame.

• Upright models are stackable and interstackable ideal for visitor and waiting areas.
• Coordinating tresko stool available (TRESKK911B)
• Safe working load of 160kg with exception of the specialist Bariatric chair
• Options: Housekeeping wheels, arm pads, integral pressure cushion, filled in sides, wings, infection control seat, height adjusters, floor protection, seat locking device, fixed seat, combi adjusters
• Models available with 3 seat height options: 450mm, 490mm & 530mm

• Models available with 2 seat depth options: 425mm, 470mm

• Height adjusters allows leg adjustment from 0mm to 25mm, 50mm, 75mm or 100mm
Optional Extras

1. **Armpads**
   For higher levels of comfort and to protect bony prominences on users who may be seated for long periods

2. **Wings**
   For added comfort and security

3. **Filled in Sides**
   For higher levels of comfort and to protect bony prominences on users who may be seated for long periods

4. **Housekeeping Wheels**
   When tilted beyond 30 degrees, the wheels come into contact with the floor to ensure easy movement of the empty chair, assisting staff with manual handling

5. **Height Adjusters**
   Provides 4 increments of 25mm. Accommodates users of different postures

6. **Combi Wheel**
   (Housekeeping Wheel and Height Adjuster)
   Ensure easy movement of the empty chair to assist in manual handling whilst accommodating for users of different postures

7. **Fixed Seat**
   For added security and support
Optional Seat Cushions:

Profiled Reflexion Pressure Distribution Cushion
Reflexion foam moulds itself to the contours of the user, this helps to spread the body weight more evenly across a greater surface area.

Pommel Reflexion Pressure Distribution Cushion
The pommel cushion helps the user to stay in sitting position if prone to sliding forward.

Gel Profile Reflexion Pressure Distribution Cushion
The gel profile cushion adjusts to the users body movement and helps to spread the body weight more evenly whilst protecting high pressure areas.

Chair Design for Tissue Viability
Correct posture is one of the most important factors in preventing the development of pressure ulcers. Sitting correctly ensures that weight is evenly distributed and shearing forces are reduced.

Profiled Conventional Pressure Distribution Cushion
CMHR seat cushion for low risk.

Profiled Reflexion Pressure Distribution Cushion
Reflexion foam moulds itself to the contours of the user, this helps to spread the body weight more evenly across a greater surface area. Reflexion foams conform to BS3379 class “V”, intended for use in high risk applications.

Pommel and Gel Reflexion Pressure Distribution Cushions
Use with high risk patients.

A Ply Base Seat Platform
Use with own specialist cushion.
Rossetti combines fresh, contemporary styling with the comfort of supportive upholstery, suited to lounges and reception areas.
• Ergonomically designed backrest gives excellent lumbar support and increased comfort
• Supportive arms aid rising
• Seat supplied with waterproof under bottom as standard
• Hygiene gap prevents trapping of dirt and bacteria between the seat and back
• Showwood trim helps prevent wear and tear

EVEK4203
Eve Stool
H 350 W 580 D 580
Ergonomically designed in conjunction with clinicians and end users. A range of both manual and electric actions are available.
Recliners
Key Features

Standard Feature
- Standard back and compact arm make maximum use of limited space
- Containment back provides additional support comfort and safety
- Arms positioned away from high contact areas to produce a completely seam free seat
- Recliner action is smooth and multifunctional
- Incorporates heavy duty, lockable, easy-clean castors for manual handling and infection control purposes

Optional Feature

Recliners

Wider equipoise arm can be used to administer treatments such as blood transfusions or dialysis in the chair

Manual recline system incorporates a unique-pull cord mechanism designed by Knightsbridge
Recliners

Key Features

**Manual**
A manual push on the back provides a simultaneous footrest and back movement.

**Tilt In Space**
The tilt in space mechanism allows you to independently adjust the position of the backrest and to tilt the chair backwards and forwards moving the leg rest at the same time avoiding shearing of the back and the hips. Once the leg rest is all the way down it will rise to aid in standing.

**Single Motor**
The seat and back of this particular mechanism has a fixed angle that doesn’t change during the recliner movement as the seat tilts with the back as the footrest is extending allowing the user to have full and total support avoiding shearing of the back and hips.

**Dual Motor**
The Dual mechanism has two motors that will independently drive the back and foot rest but will still bring the chair to a near standing position. The user has total control of the exact movement to the angle of recline on the backrest and the footrest i.e. the footrest can be elevated and the back remain in an upright position. The control is totally independent of each other enabling the user to achieve their own individual position of comfort for relaxing.

**4 Motor System**
This mechanism has been designed and built to cope with weights of up to 70 stone and severe fluid retention. The rise/recline movement is controlled by individual motors with the seat lift having 2-motors that are synchronised to ensure user comfort and safety.

**Trendelenberg**
The Trendelenberg action allows the recliner to move with independent back and footrest movement to lay flat on the back (supine position) with the feet higher than the head by 15-30 degrees.
Kintyre

- Static load tested to 120kg
- Back can be stopped at any stage in the recline to allow the user to find a comfortable position
- Available in vinyl to allow easy effective cleaning

- Manual recline system incorporates a unique-pull cord mechanism designed by Knightsbridge which can be grasped at any point along the cord and pulled in any direction to operate the back recline. It can also be pulled on to assist the patient in returning to the upright position.

Harris

- Clean and simple styling that will harmonise with most interiors
- Compact footprint
- Padded seat and back cushions provide high levels of comfort
- Solid frame ensures long term durability and strength
Overnight Stay
Domino

- The simple compact sofa with minimum effort can be converted quickly and simply to a chaise, daybed or full size functioning bed. Offering reliability and comfort for prolonged visits by guests or family members
- Multiple reclining arm positions
- Legs allow easy floor access for cleaning
- Intuitive conversion from sofa to bed to sofa
- All surfaces of the sofa are easy to clean and maintain
- Operation: Foot-press pedals allow the arms to fold horizontal. Flip over the back cushion to form a convenient shelf. Lift the arms to ratchet into your choice of position

- Great Britain Patent No. GB2483056
  European patent application pending No PCT/EP2011/004189

Fortress Locker Features

• Trespa® construction provides a robust construction and long life span giving the end user complete piece of mind

• Completely flat underside for easy cleaning and reduces areas where dirt can become trapped

• Easy clean external construction with rounded corners design to provide a smoother to wipe external surface coated in durable White Nylon modified polyester

• Upper work surface is manufactured from medical grade Trespa® compact work top, this provides a very durable and easy to clean surface.

• Easy access upper rear door - The doors on both upper compartments fold round 180 degrees to allow full access to the storage and the internal surfaces are also curved to avoid difficult to clean corners and also run edge to edge to allow the area to be wiped front to back with no lips to harbor dirt.

• Trespa® storage shelf - highly durable white Trespa® shelf that can quickly removed for cleaning mounted mid height in the lower unit. (only available on FORTRC1203)

• Easy clean all braked castors

• Unique steel drawer box constructive with easy clean profile

Seven carcase colour options available:

Purple  Pink  Red  Orange
Yellow  Green  Blue

Folded steel carcase for virtually seamless construction

Compartment operated by a keyless lock operated by use of a patient wrist band fob

Unique steel drawer box constructive with easy clean profile

Stylish & very practical design which effectively eliminates sharp corners

www.knightsbridge-furniture.co.uk

*when evenly distributed

www.knightsbridge-furniture.co.uk
Knightsbridge Furniture design and manufacture healthcare furniture based on best practice infection control methods and are continually developing new technologies and manufacturing methods to help in the constant fight against HAIs.

**Biocidal Wood Lacquer**

Using Becker Acroma Hygiene+ biocidal wood lacquer, Knightsbridge Furniture provide not only protection against bacteria, but also prevention! Clinically proven to kill 99% of bacteria over a 24 hour period, Hygiene+ is specially formulated to meet severe use requirement and is constantly working in the fight against bacteria, germs and viruses.
Pressure Care Option

Chair Design for Tissue Viability
Correct posture is one of the most important factors in preventing the development of pressure ulcers. Sitting correctly ensures that weight is evenly distributed and shearing forces are reduced.

Profiled Conventional Pressure Distribution Cushion
CMHR seat cushion for low risk.

Profiled Reflexion Pressure Distribution Cushion
Reflexion foam moulds itself to the contours of the user, this helps to spread the body weight more evenly across a greater surface area.

Reflexion foams conform to BS3379 class “V”, intended for use in high risk applications.

Pommel and Gel Reflexion Pressure Distribution Cushions
Use with high risk patients

A Ply Base Seat Platform
Use with own specialist cushion

Interface Pressure Mapping Trial
The pressure maps below illustrate the amount of pressure sitting on a conventional CMHR seat cushion (map 1), compared with a Reflexion seat cushion (map 2) after a period of 16 minutes.

All tests were conducted using our Hamilton Patient Chair with an identical protocol applied to each. The lightest areas of contact are shown in blue, whilst the heaviest are shown in yellow.

1. Pressure Mapping Conventional Cushion

2. Pressure Mapping Reflexion Cushion

Beware of Imitations
Knightsbridge Furniture use official Vitafoam Reflexion foam. Vitafoam is the only manufacturer of Reflexion and they do not licence any other company. Reflexion clinical evidence and clinically proven ratios are not available from any other manufacturer. You may be placing your patient at risk by using imitation foam.

(1) Reflexion clinical assessments were conducted by Tissue Viability Consultancy Services Ltd

www.knightsbridge-furniture.co.uk
Fabrics & Finishes

Fabrics

Fabric choice is a crucial element in protecting patients, visitors and healthcare professionals from Hospital-Acquired Infections. Knightsbridge Furniture is able to offer you a wide choice of soft fabrics and vinyls specially designed to cope with the demands of healthcare environments, whilst offering a broad choice of colours and styles. Knightbridge stock fabrics meet BS5852 part 2 crib 5 flame retardancy.

Types of fabric

Vinyl:
Vinyl is practical, low maintenance and is available in a wide range of colours and textures. Durable, fire retardant and liquid repellent, our stock vinyl ranges incorporate anti-microbial ingredients to kill a wide range of bacteria, including MRSA and e-coli and are resistant to many common stains, including urine, mild alkalis/acids, beverages and most common household stains.

Soft Waterproof Fabrics:
Available in a wide spectrum of colours and designs, soft waterproof fabrics can be used to create relaxing environments without compromising the need for waterproof coverings. Integral anti-microbial ingredients make the fabrics effective against bacteria (including MRSA and e-coli).

Soft Fabrics:
Where usage is less severe, soft covers can create a more domestic environment and offer a wide selection of designs.

Wood Finishes

Choose from our selection of wood finishes (available on all our ranges unless specified otherwise), which include Hygiene+ anti-microbial protection to kill bacteria 24 hours a day.
How to order

Products
Select your products and item codes from the extensive collection in this brochure or visit: www.knightsbridge-furniture.co.uk

• Check the dimensions are appropriate for your requirements and that they fit your scheme and any co-ordinating product.
• Please note that seat heights are measured from the highest point of the seat.

Finishes
Fabric:
We offer a wide range of options enabling you to select a fabric suitable for your application or you can provide your own cover.

Wood Finish:
All visible polished wooden frames are manufactured from European Beech. However you can select a wood finish to complement your fabric choice or overall scheme. Alternatively you can supply a sample for us to match to.

Quotations
If you would like a quotation prior to placing your order these can be obtained from our Customer Service Team on +44(0)1274 731900 or email: enquiries@knightsbridge-furniture.co.uk

Order
The following options are available when placing your order by:
• Post to Knightsbridge Furniture
• Email to sales@knightsbridge-furniture.co.uk
• Fax to +44(0)1274 736641
• Confirmation of your quotation with our Customer Service Team

All orders must be accompanied by a valid Purchase Order and we regret we are unable to accept telephone orders.

Order Acknowledgements
An order acknowledgement will be posted to you following receipt of your order.

As all products are manufactured to order it is extremely important that the order acknowledgement is checked for accuracy and that any discrepancies are notified to our Customer Service Team on +44(0)1274 731900 as soon as possible.

General Notes
As part of our commitment to continuously improve our products and services we reserve the right to revise model specifications at any time.

There is a manufacturing tolerance of +/- 4mm on all upholstered framed furniture.
