OUR HISTORY

1938

Furniture Productions Bradford is formed in April 1938 to make domestic upholstered seating which will be sold directly to clients. World War II breaks out in 1939 and Furniture Productions joins the war effort by working for the MOD making equipment which includes a huge amount of ammunition boxes. The company continues to work right through the war.

1948

The NHS is formed in England, Scotland and Wales in July 1948 by Aneurin Bevan. World War II finally ceases in September 1945. In 1949 Furniture Productions Bradford recognises the potential merits of a new organisation called FIRA (Furniture Industry Research Association) and immediately gets involved influencing a number of developing standards to improve quality and safety in the industry. At the British Furniture Exhibition at Earls Court in 1956 Furniture Productions Bradford created a stir with its stand prop 'Furpro Freddie' - a wire sculpture by Pullman.

1958

The iconic Morris Mini is launched in time to see the M1 motorway open. The Beatles are dominating the charts, and FURPRO as Furniture Productions Bradford are now known for supplying seating directly into the NHS, following its acceptance as the first seating company to be awarded a contract on the newly formed PASA supply chain. The business is still selling domestic furniture through outlets such as Lewis', Schofields and Claridges in London. In response to trend changes in everyday life and the rise of atomic design, FURPRO releases its Axiom Chair which also demonstrates a move towards the contract market.

1968

We see the first man on the moon in 1969 and inspired by all the things Lunar and futuristic, the UK's first all moulded foam seating 'Fuma Bay Suite' is promoted in 1971. This coincides with decimalisation of our currency and it is only another year before Concord completes its first transatlantic crossing. Around the time Concord was a regular scheduled supersonic service, FURPRO won the gold medal at The Furniture Show for the Scheherazade range. Influenced by the 1920s it was seen as a modern element to complement the then popular mock-Georgian house styles.

1978

The late 1970s sees the first test tube baby, Thatcher coming into power and a new logo to represent the geometric design flavours of the styling world. FURPRO continues to grow from strength to strength in the contract world, our part of the then PASA supply chain for the NHS and establishing work relationships in the domestic world for the likes of Laura Ashley for its soft furnishings.

1988

With the rise of the housing boom and the fall of the Berlin Wall in 1989 the company looks to strengthen its healthcare offer and considers another brand change to reflect the level of craftsmanship and quality it offers. The company purchases James Chase and Sons brand to fortify its presence in the ecclesiastical market after making their seating ranges for more than a decade. The early 90s sees the company release the most comprehensive and cohesive acute care range ever seen which is called Hamilton with 24 different models and numerous options. This proves to be a shrewd move which the competition can only follow. With the company's affiliations with the likes of FIRA, BCFA and The Worshipful Company of Furniture Makers we become key influencers of the Furniture and Fire Safety Regulations of 1988 and the development of fire-retardant foams for furniture, which is seen as a major change in fire safety. To mark these achievements, FURPRO changes its name change to Knightsbridge Furniture Productions Ltd.

1998

NHS Direct is launched in 1998, digital television is introduced and the euro is established as a currency. The Spice Girls are the leading female super group promoting 'Girl Power'. Knightsbridge launches the 'Alpha' range - an ergonomically superior range of chairs based on a shell, complete with sporting arms made from self-skinning foam to aid cleaning and improve durability. It proves to be well accepted and perfectly in tune with the styling of the time. In 2005 the Design in Mental Health Network is conceived and Knightsbridge is seen as a key influencer on the progression of the furniture field.

2008

The company thrusts forward with dedicated furniture lines for the mental health market, working closely with experts at the likes of Rampton and Carstairs Hospitals. This results in winning successful major refurbishments for all establishments - once again leading the way in healthcare design. In 2010 sadly Knightsbridge's founder and Chairman, Dr Arnold Moore dies at 93 leaving an immense legacy in the industry to his charity, Bradford's War on Cancer, now part of Cancer Research UK.

2015

2015 marks a change in our company with the recumbent owners of 77 years, retiring to make way for a new leadership team with fresh ideas to drive us forward. At this time, we decided that more design-led ranges were needed to appeal to the corporate and hospitality sectors which culminated in four new ranges being launched at Clerkenwell Design Week in 2016 to much acclaim. Our efforts were rewarded by winning Design Team of the Year in 2017 just before our 80th anniversary in 2018.

2022

Efforts are concentrated on our core markets with great progress being made on products for the mental health sector and relationships being established for future design collaborations. Following a huge push to support the healthcare market during Covid, we manage to present a number of new ranges in June to an eager audience at D.I.M.H. including the Asana modular range.

Welcome to our Challenging Environments Book, we hope you find it as inspiring as we have compiling it.

CHALLENGING ENVIRONMENTS SEATING SPECIFICATION

Designed to suit the demands of a diverse range of challenging behaviours, our mental health collection has been created with the specific needs of healthcare providers and patients in mind.

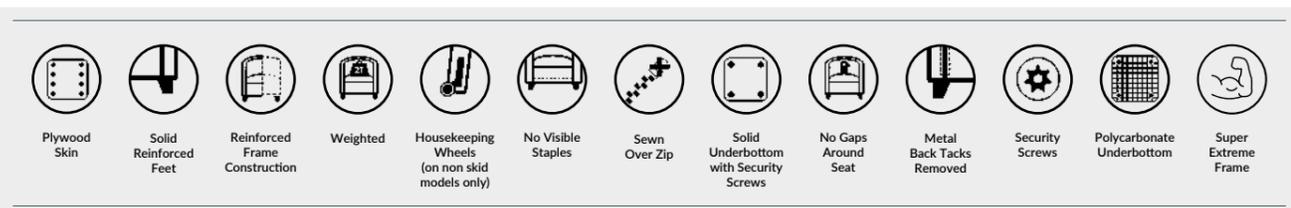

Many of our products have been developed following extensive research working closely with customers. From concept through to production, we have worked to create safe and robust yet stylish products to help build an effective, practical and therapeutic environment.

Our EXTREME Seating Specification includes:

- Plywood skinning on all possible faces - including plywood underbottom reinforcing and adding weight
- No visible staples
- Use of security screws in exposed areas
- Extreme feet fitted with stainless steel security screws
- Removal of any metal back tacking or crocodile strips
- Optional weighting of selected chairs and settees to prevent lifting
- Zip tag over sewn
- No gap down side of seat and back where possible
- Secure underbottom with security screws

The icons shown inform you of the features and benefits applicable to each individual range

Here is an overview of all the features available which will support your decision making and hopefully benefit your facility. These features have been devised through extensive consultation with professionals in the field, but please talk to us if something you require is not listed. Remember, Knightsbridge is quite unique in that we are a design and build company, unlike most of the furniture providers you may engage with.

- Plywood Skinned Outer Panels** - prevent the structure from being compromised under attack.
- Reinforced Feet** - Our challenging environment feet have been designed by us with a shape which minimises ligature risk. It is die cast in the UK using super reinforced P6 nylon material and fixed with M8 stainless steel Pin-Torx security screws.
- Reinforced Frame Construction** - For our challenging environment range the actual inner frame design has been developed to provide the most robust finish while maintaining functionality and comfort.
- Weighting** - Where a heavier product is required in more demanding facilities, we offer multiple weighting options using steel ingots or sealed bags of sand.
- Staples** - There are no visible staples on all the products in this catalogue. We have taken into account the total concealment of staples where they are needed in producing a model.
- Zips** - Only a few products in the collection have zips and they are clearly indicated. Where zips are used, the zip tag is removed. The end is also glued / over-sewn.
- Under-bottom** - All products are fitted with either a 6mm or 18mm Hardwood Ply under-bottom as standard. All under-bottoms are sealed with anti-microbial lacquer and fixed in position with stainless steel pin-torx security screws.
- Gaps Round Seat** - Our designs are developed to reduce or eliminate gaps round the seat area to discourage concealment, aid cleaning regimes and support security checks.
- Back Tacking Strip** - Used widely in the upholstery market, this fitting is a major security risk. We have called upon our huge skill base to completely omit this from being used in Knightsbridge products.
- Security Screws** - As previously mentioned we exclusively use stainless steel Pin-Torx security screws for our visible fixing methods.
- Polycarbonate Under-Bottom** - If your facility requires an extra layer of security checking, you will find most of our larger products are available with 6mm thick Palsun Polycarbonate under-bottoms.
- Housekeeping Wheels** - To support housekeeping services in lower security settings, we do offer housekeeping wheels on a number of ranges.
- Super Extreme Frame** - These products are built to the highest possible specification when strength and durability is concerned with our unique super strong frame design. Due to the amount of construction inside these products, weight is also increased considerably.

EXTREME FITTED FURNITURE

EXTREME FITTED FURNITURE

EXTREME FITTED FURNITURE RANGE

Knightsbridge Furniture offers a selection of fitted furniture manufactured from a variety of substrates which offers optimum strength, stability and design for your building which is tailored to your specific needs.

Every project is built to meet your own space requirements, design features and colours. We take into account the level of security required during our initial consultation and offer the correct substrate and designs to match your environment and budget needs. All surfaces are durable, hard-wearing and easy to clean.

Options offered to provide maximum safety and minimal risk include:

- Anti-ligature considerations
- Anti-tamper fixings
- Anti-pick mastics
- Non-removable drawers
- Wardrobes with or without doors
- Doors with piano hinges
- Sloping tops
- Integrated anti-hide spaces

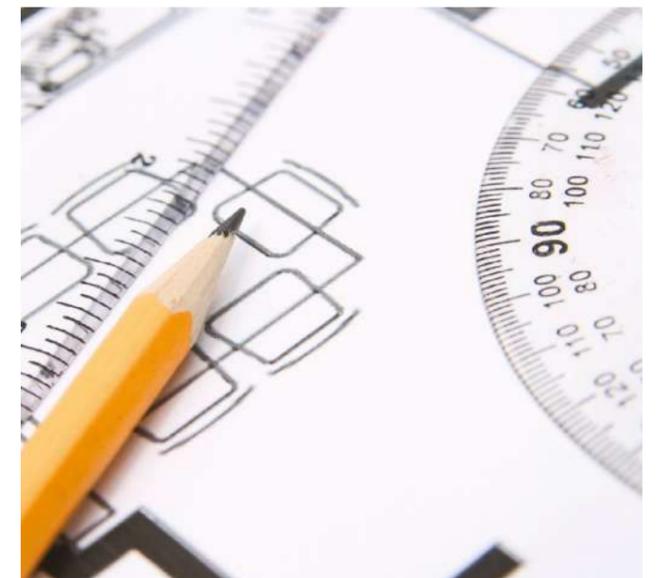

We offer a bespoke design, manufacture and installation service to ensure that the finished result is produced to your individual specification.

As an approved NHS Supply Chain contractor specifically endorsed for Mental Health environments (NHS Mental Health Contract Number 2012/S 38-061381) Knightsbridge Furniture offers a complete project management service including design, scheduling and installation.

Samples can be made available for mock-up rooms to give you peace of mind that you are selecting the best choice.

From site surveys through to pre-start meetings and project handover Knightsbridge Furniture's contract management team will keep you informed and work to your exacting standards.

Fitted furniture is available for almost all areas of your environment including bedrooms, lounges and bathrooms.

SCOTIA EXTREME

SCOTIA EXTREME

Scotia Extreme specification with special features for challenging environments

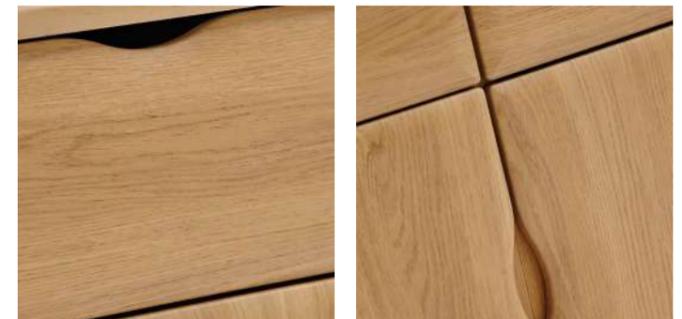

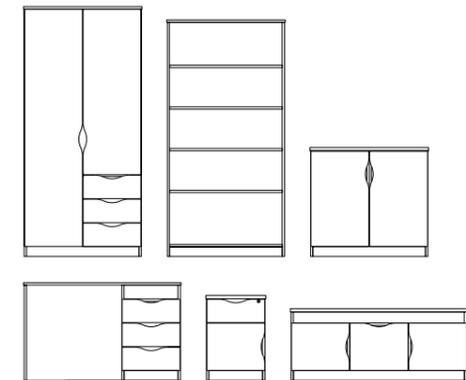

- Non removable drawer boxes
- Security screws
- One lock included on all bedsides
- Wardrobes have fixed shelf with anti-ligature upstand, concealed fixings and additional screw fixings through back panel into back edge of shelf
- All other shelves fixed

FABRICS & FINISHES

Not only is creating market-leading furniture our specialism, fabrics and finishes are our forte. Choosing the correct upholstery material for a healthcare or care setting is crucial in protecting patients, visitors and professionals from hospital-acquired infections.

Knightsbridge Furniture's fabrics have been specially designed and developed to cope with the demands of healthcare environments, whilst retaining an attractive and modern aesthetic. Our choice of soft fabrics and vinyls are not only efficient for these types of settings, they come in a wide range of colours and styles, as well as our stock fabrics meeting the BS5852 part 2 crib 5 flame retardancy standard.

Vinyl:

Popular within hospitals and healthcare settings, vinyl is practical, low maintenance and easy to clean. Not only does it have an abundance of practical features, it is available in a wide range of colours and textures to suit the branding or style of individual settings.

Durable, fire retardant and liquid repellent, our stock vinyl collections incorporate anti-microbial ingredients to kill a wide range of bacteria, including MRSA and e-coli. This material is also resistant to many common stains including urine, mild alkalis/acids, beverages and most common household products.

Fabric: Skopos Bonita Lima

Fabric: Camira Blazer Oriel

Vinyl: Chieftain Just Colour Bubblegum

FABRICS & FINISHES

Soft waterproof fabrics:

Available in a wide spectrum of colours and designs, soft waterproof fabrics can be used to create relaxing environments, without compromising the need for waterproof coverings. Multi-functional, attractive and practical, our soft waterproof fabrics have integral anti-microbial ingredients, making the fabrics effective against bacteria, including MRSA and e-coli.

Soft fabrics:

Where patient usage is less of a consideration, soft covers can create a more domestic and homely environment. Our collection of soft fabrics come in a wide selection of designs and colours, ensuring that whatever the design of your scheme, we will have a fabric to complement your décor.

Wood finishes:

As well as our soft and vinyl fabrics, we also offer a selection of wood finishes. A wood finish is available on all of our ranges, unless specified otherwise, and includes hygiene+ anti-microbial protection to kill bacteria 24-hours a day. This is an excellent choice for settings where minimising the spread of infections and viruses is of the upmost importance.

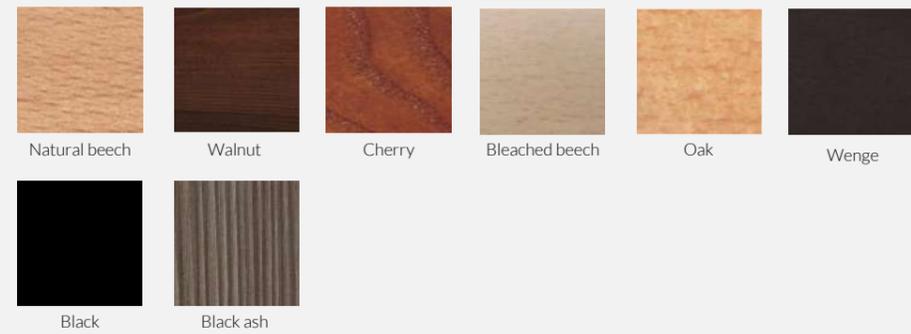

Table top options:

All our table tops are available in a choice of Natural Beech, Walnut and Oak to complement our wood finishes as well as white and black. Please specify top and frame finish at time of order. We also offer a choice of two edge profiles on our standard tables. All challenging environment tables are supplied with a 32mm thick top with bullnose edge.

Standard table edge profile options (standard ranges only)

Polished Chamfer (LP2)

Square Lip (SL25)

All challenging environment tables
