Dimensions shown in mm

Key Features

- Smooth, rounded design with no sharp edges for enhanced safety
- Contemporary styling suitable for modern healthcare environments
- Weighted and shaped to deter lifting, tampering, or misuse
- Engineered for demanding settings, combining strength with reassurance
- Fully enclosed seat base with no gaps or access points
- Securely fixed base using stainless steel security screws

Material Specification

Designed in collaboration with **David Fox Design**, Onion is a versatile tub seating solution suited to both hospitality and healthcare environments. Engineered for strength and durability, it features a robust internal frame constructed from a combination of particle board and plywood, with additional plywood reinforcements for enhanced performance in challenging environments.

The weighted, sculpted form helps deter movement or misuse, while the plinth base (coated in an anti-microbial lacquer finish) prevents dust and debris build-up. All cushions are securely fixed to the base, manufactured using fire-retardant CMHR foam.

A fully enclosed base improves hygiene and maintenance, and the unit is secured with stainless steel tamper-resistant fixings to ensure stability and safety.

Assembly

Arrives assembled and ready to use.

Delivery

Leadtime 9 weeks.

Options

- Available in a wide range of water-resistant fabric and vinyl upholstery finishes
- Plinth base available in Natural Beech as standard 
- Other options include Black, Black Ash, Bleached Beech, Oak, Silver Oak, Cherry, Walnut and Wenge 
- Can be additionally weighted (+20kg)
- Available in a two-tone fabric option (one fabric for outside and a second fabric option for inside of chair)
- Different fabric for the seat cushion will require a bespoke request

Test Standards

Description	Accreditation
Fire retardant	BS 5852:2006 (Section 12, Ignition Source 5)
Strength & stability	EN 16139:2013 (Level 2)
